

Databricks in a Day Workshop

Maximize the value of your data and analytics.

About this workshop

Data is the lifeblood of business, but its value can only be unlocked when your teams are empowered to turn data into action. Built on Apache Spark™, Databricks helps you capitalize on your data and analytics efficiently and flexibly — and Insight will help you tap into its full potential in just one day.

In this interactive workshop, you'll work with specialists to better understand Databricks and harness its power to improve business outcomes. Tapping into a deep pool of resources, you'll uncover:

- Proven Databricks techniques to apply in guided labs
- Foundational best practices in provisioning & security
- Ways to tackle challenges with Big SQL, streaming analytics & machine learning development
- New business analytics tools that solve a broad range of challenges

Who should attend

Business stakeholders interested in Databricks or Spark, as well as operations or development specialists will find value in this workshop. Data scientists looking to build advanced R or Python models over large datasets will also benefit from this engagement.

Workshop topics

This workshop provides hands-on experience with:

- Transactional SQL using Databricks Delta
- BI dashboard integration with Spark SQL
- Real-time intelligence with Databricks Structured Streaming
- Data science exploration with Databricks MLflow

About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organization run smarter. We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.
